July 25, 2001

Secretary Spencer Abraham
1000 Independence Ave SW
Forrestal Bldg 7A-257
Washington, DC 20585

Secretary Abraham:

Public health and safety standards for Yucca Mountain must be based on sound science. Controversy over standards that lack scientific basis, as proposed under the previous administration, should not be permitted to stand in the way of a decision.

DOE must keep on schedule to ensure timely movement of used fuel from nuclear facilities around the country.

I urge you to make used nuclear fuel disposal one of your highest priorities.

Sincerely,

Harold P. Erdman
